

The background of the slide is a collage of two images. The left side shows a close-up of a beach covered in various types of coral and seashells. The right side shows a sandy beach with many small, light-colored shells scattered across the surface.

Giovedì 10 dicembre ore 11.00 in aula 'Lucchesi'  
la Dr. **Claire Reymond** del Leibniz Center for Tropical  
Marine Ecology (ZMT) - Bremen  
terrà un seminario dal titolo

'Transitional carbonate communities:  
examples from Australia, Mauritania  
and the Galápagos'

tutti gli interessati sono invitati a partecipare
